With what kind of glass
will you have a drink tonight?

When I had a drink
with this glass,
I was ashamed of making remarks
on what's old and new.

Denied old ideas.

And demanded new senses.

On such a night, I found this glass at a place.

Edo Kiriko? A black one?

It's new.

But, yet you can also feel sense of tradition there.

Neither the tradition nor the vogue matters

Only what's good will remain.

And that's all.

R I N G

Each ring represents growth ring of a tree. The evenly spaced out rings symbolize the quiet but constant growth of life each year.

S T R I P E

Cutting out the growth rings vertically will create a surface with stripes of straight grain. Straight grain items are luxurious as they can only be produced from the center of trees. This glass has evenly spaced out stripes, designed to image the straight grain.

I C H I M A T S U

If you magnify plant cells, you can see an evenly lined mysterious world like the check (Ichimatsu) patterns. And in each of the cells, there is a spherical nucleus, just like the polished sphere in Ichimatsu patterns
